

SKILLS	
Tools:	Bash, Terraform, Docker, Docker registry, Docker compose, CloudFormation, ARM templates, Git, Kubernetes, Python, Grafana, SonarQube GitHub actions, Bitbucket pipelines, Jenkins, Amplify, Azure Web App, Code Deploy.
Platform:	Azure, AWS, Google Cloud.
Soft Skills:	Client management, deductive troubleshooting, creativity.

EXPERIENCE	
DevOps Engineer - Cognativ Inc.	October 2023 - Today
- Experience implementing CI/CD tools, accelerating development, testing, and deployment across various projects, using diverse platforms and technologies. - Constantly collaborating to drive a shift towards a DevOps culture, building bridges between development and operations teams, tackling the challenge of fostering a more collaborative, communicative, and automated work environment. - I have worked with clients in the EdTech, finance, and streaming services industries, collaborating with professionals from the United States, Serbia, Spain, Argentina, and India.	
Freelancer	2019 - 2023
- IT Infrastructure Consultant: Server administration, networking, and maintenance for institutional and corporate clients. - Clients: National University of Villa María, MG Cleaning Company, Tecnoteca Villa María, Corpus Médical.	

PROJECTS	
Vector Media	December 2024 - February 2026
- Implementation of CI/CD pipelines using GitHub Actions - Infrastructure as code creation for DigitalOcean using Terraform and Ansible, including droplets, managed databases, networking, and managed Redis - Dockerization of 3 payment APIs and a frontend application	
CloudIX	December 2024 - February 2026
- Implementation of CI/CD with GitHub Actions. - Infrastructure as code creation for GCP using Terraform, including Cloud Run, VM, Key Management, Secret Manager, Cloud SQL for Postgres, and Cloud Storage - Self-hosted SonarQube instance for SAST quality checks	
Metamorphix	October 2023 - July 2024
- Implementation of CI/CD with Bitbucket Pipelines using a runner on Azure VM. - Containerization and optimization of artifacts for a NestJS backend and NextJS frontend. CI/CD for a custom Keycloak template. - Infrastructure setup based on Azure Web App Service with continuous deployment via Docker tags, Azure Container Registry, OpenVPN, ETL VM, PostgreSQL Flexible, Azure Storage, and Azure Containers. - Metrics integration in Grafana, configured with role-based access through Azure Web App Service.	
Equal Edge	November 2024 - Today
Creation of full infrastructure as code for AWS using Terraform, including RDS PostgreSQL, S3, AppRunner, API Gateway, and Cognito.	
Honest Game	April 2024 - Today
- Implementation of CI/CD with GitHub Actions. - Infrastructure as code creation for AWS using Terraform, including Amplify, Lightsail, RDS PostgreSQL, Lambda functions, SQS, EC2, S3, OpenVPN, and Elastic Container Registry. - Conversion and migration of a production MariaDB database to MySQL via SQL dump, followed by migration to PostgreSQL using PGLoader. - Debugging and maintenance of a production PHP Laravel application running on a Kubernetes cluster.	
The Inception Company	August 2024 -Today
- Documentation, maintenance, and support of a pre-existing hybrid infrastructure (on-premises and AWS) connected via AWS Direct Connect, including a TV-style studio with live broadcast equipment based on NDI and servers running proprietary applications. - AWS EC2 VMs hosting Node.js applications, FFmpeg, CUDA, and proprietary software in C. - Migrated infrastructure from ec2 based machines to elastic beanstalk and S3+ CloudFront. - Implementation of CI/CD with GitHub Actions. - Live event support: debugging and studio equipment operations (NDI, on-premises windows server)	
eClose	February 2024 - August 2024
Infrastructure creation in AWS using API Gateway, EC2 ETL, OpenVPN, Snowflake, Lambda, S3, and Amplify.	
Billd	June 2024 - August 2024
- Maintenance, support, and documentation of pre-existing infrastructure, migrated to Terraform. - Containerization of .NET applications and migration from Elastic Beanstalk to App Runner, achieving cost reduction. - CI/CD implementation using Bitbucket Pipelines. - Infrastructure included a .NET backend on Windows IIS, Angular frontend, Elastic Beanstalk, EC2, S3, Amplify, RDS Microsoft MySQL, API Gateway, Cognito, ECR, and OpenVPN.	
LLFounds	October 2023 - April 2024
- Maintenance, support, and documentation of existing AWS infrastructure. - Security enhancements in VPC, security groups, subnets, and roles. - Infrastructure included an Angular frontend and a Node.js backend.	
Paradigm Cyber, Extermpore, Screen360 y Tactive	October 2023 - Today
Support	
Cognativ	October 2023 - Today
Administrator of Microsoft 365, Zoho, AWS, Slack, Azure, and Bitdefender.	

CERTIFICATES	
AWS Certified Solutions Architect (Associate) - Link	December 2025
Azure Administrator Associate 104 - Link	September 2025
Azure Fundamentals 900 - Link	June 2024
AWS Cloud Practicioner - Link	December 2023
Cambridge C1 Advanced- C2274250	June 2023
EducaciónIT (Azure Fundamentals) - Link	September 2022

EDUCATION	
National University of Villa Maria Bachelor in Audiovisual Design and Production	Villa María, Argentina March 2012 - December 2019
